

Decoding Customer Intent

Optimizing Growth through Behavioral Analytics

e-Commerce

Executive Summary: High-value segments obscure an overall conversion challenge

The Baseline 0.9% Overall Conversion Rate (vs 1-2% Industry Standard)	The Engines  Province 1 & Marketing Tier 1 drive >90k transactions and the highest conversion rates.
The Behavior  Activity spikes in May/June and daily at 12:00 PM (Lunchtime Economy)	The Paradox  Majority of transactions occur without vouchers, signaling high organic intent.

Data Scope & Integrity

Volume:

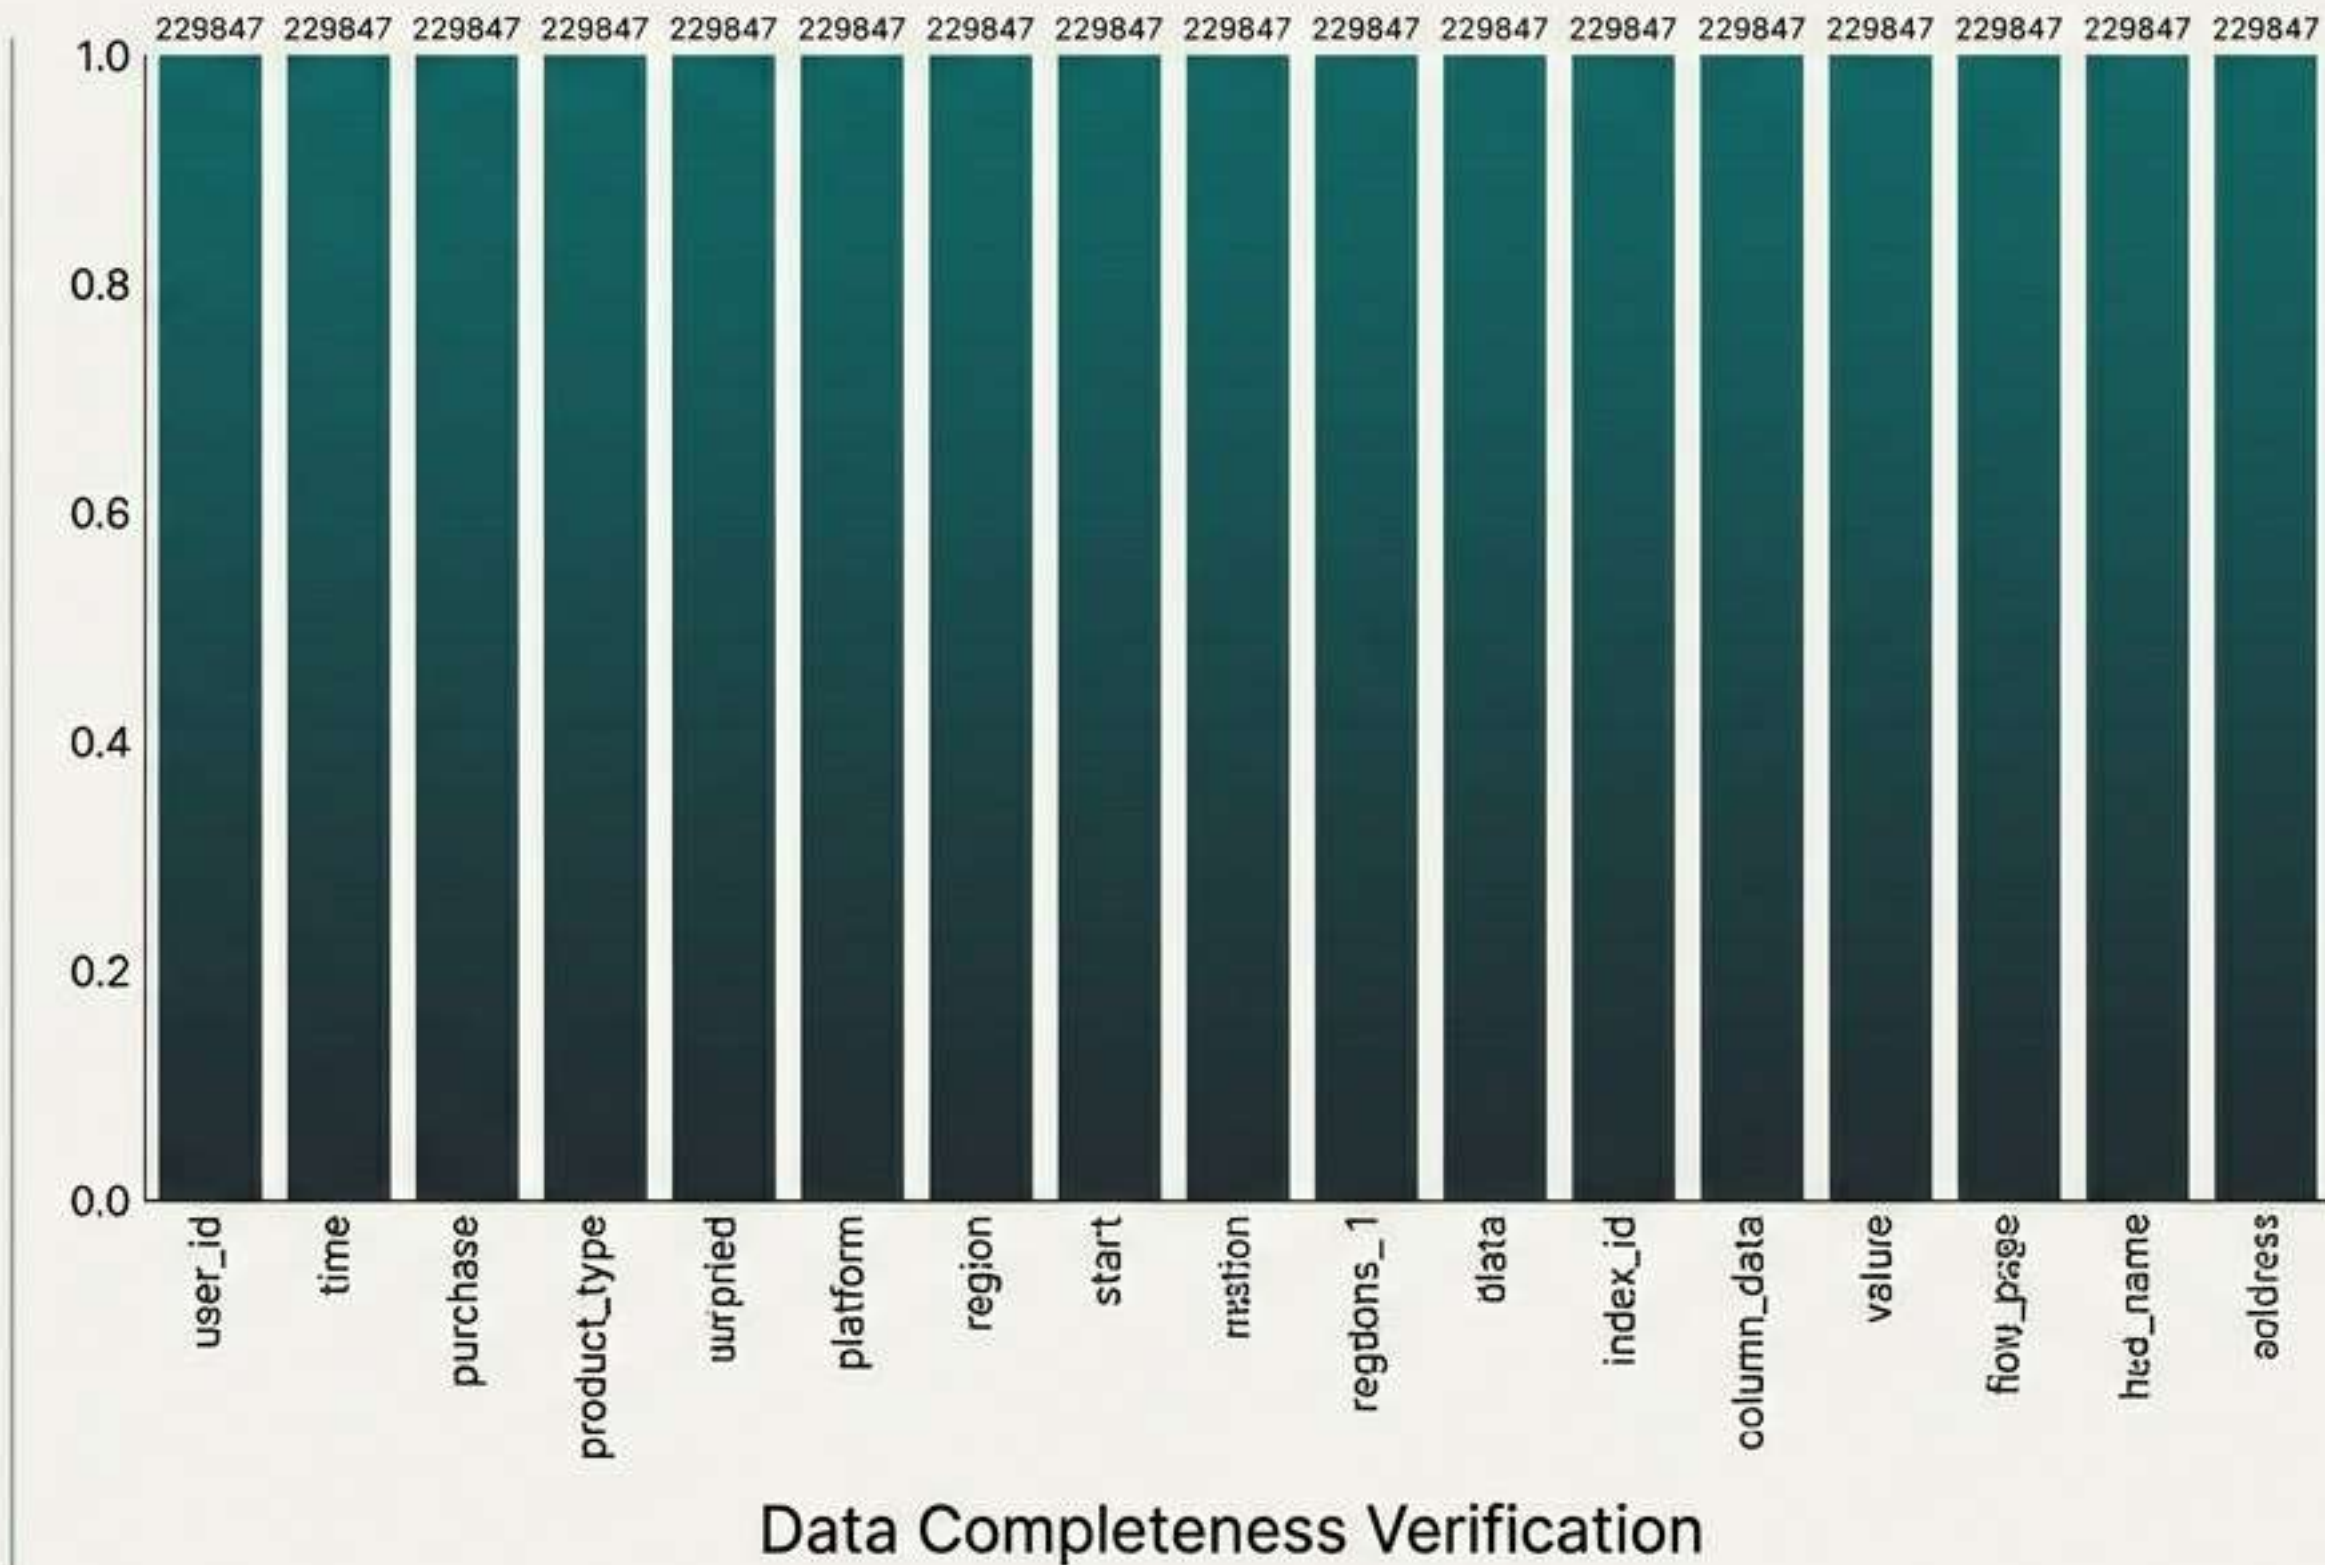

Analysis performed on 229,847 distinct customer behavior rows.

Hygiene:

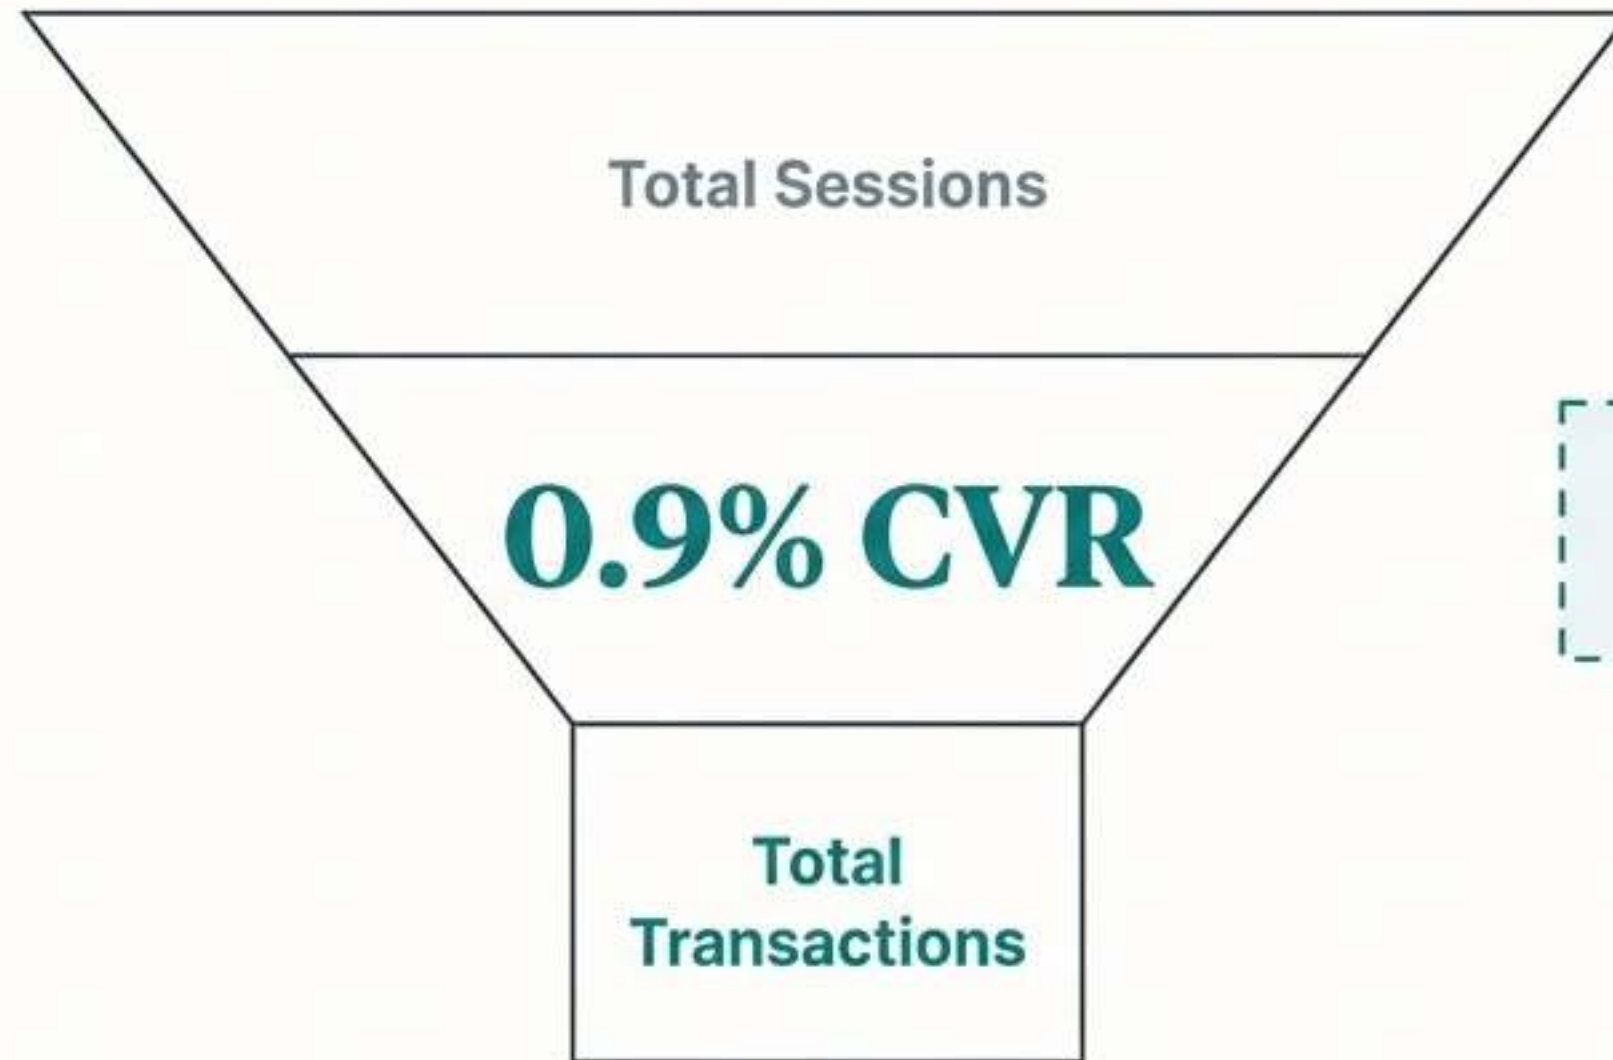

Dataset cleaned of null values and duplicates to ensure statistical significance.

Timeline:

Focus window:
April – June 2015.

The Challenge: Our 0.9% baseline conversion rate signals significant leakage

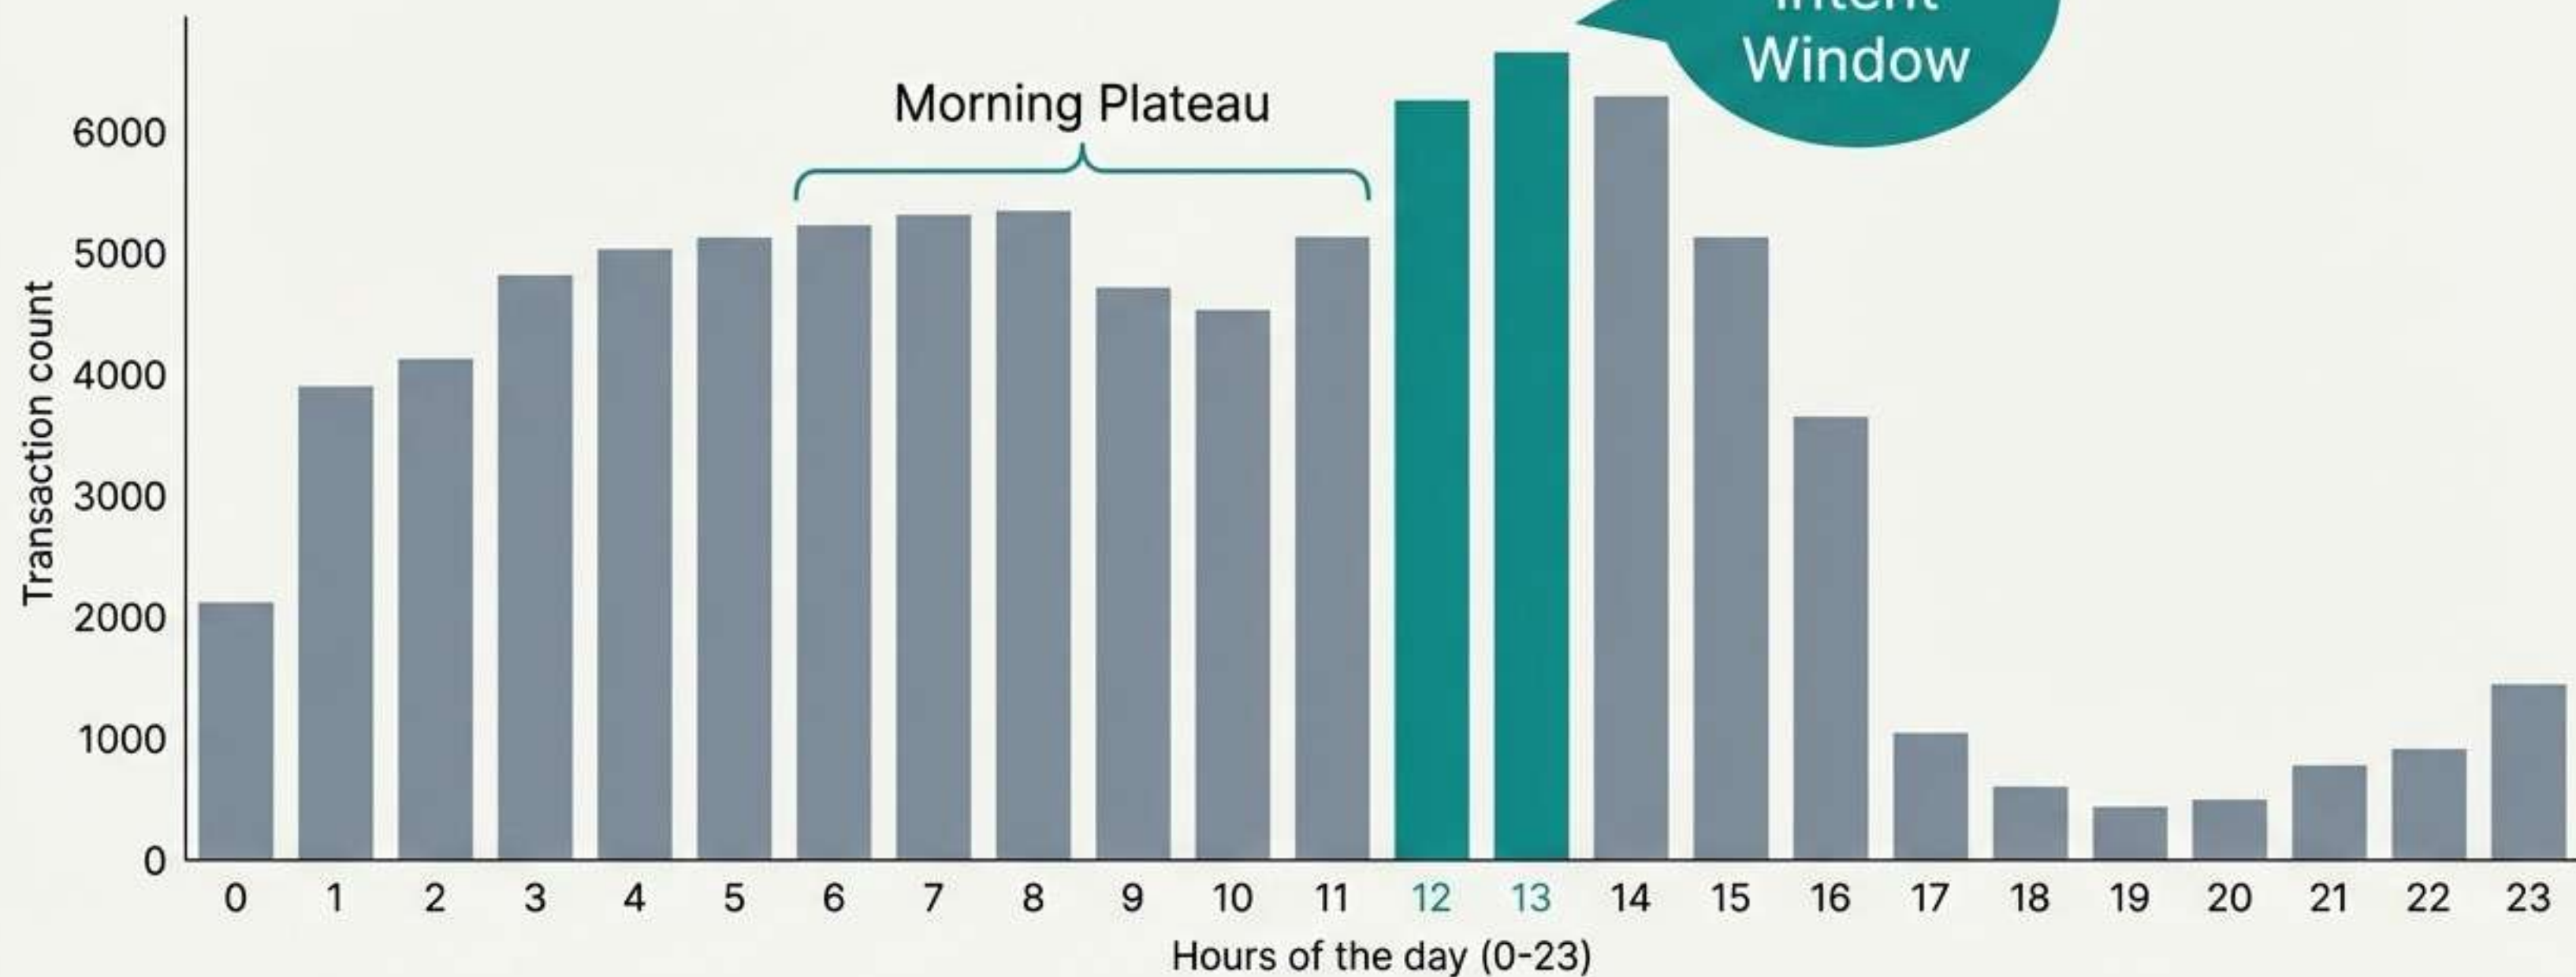

Industry Benchmark:
1.0% – 2.0%

Current state: ~9 conversions per 1,000 users.
Goal: Double efficiency to reach parity.

Seasonal Momentum: Conversion efficiency surged entering the mid-year.

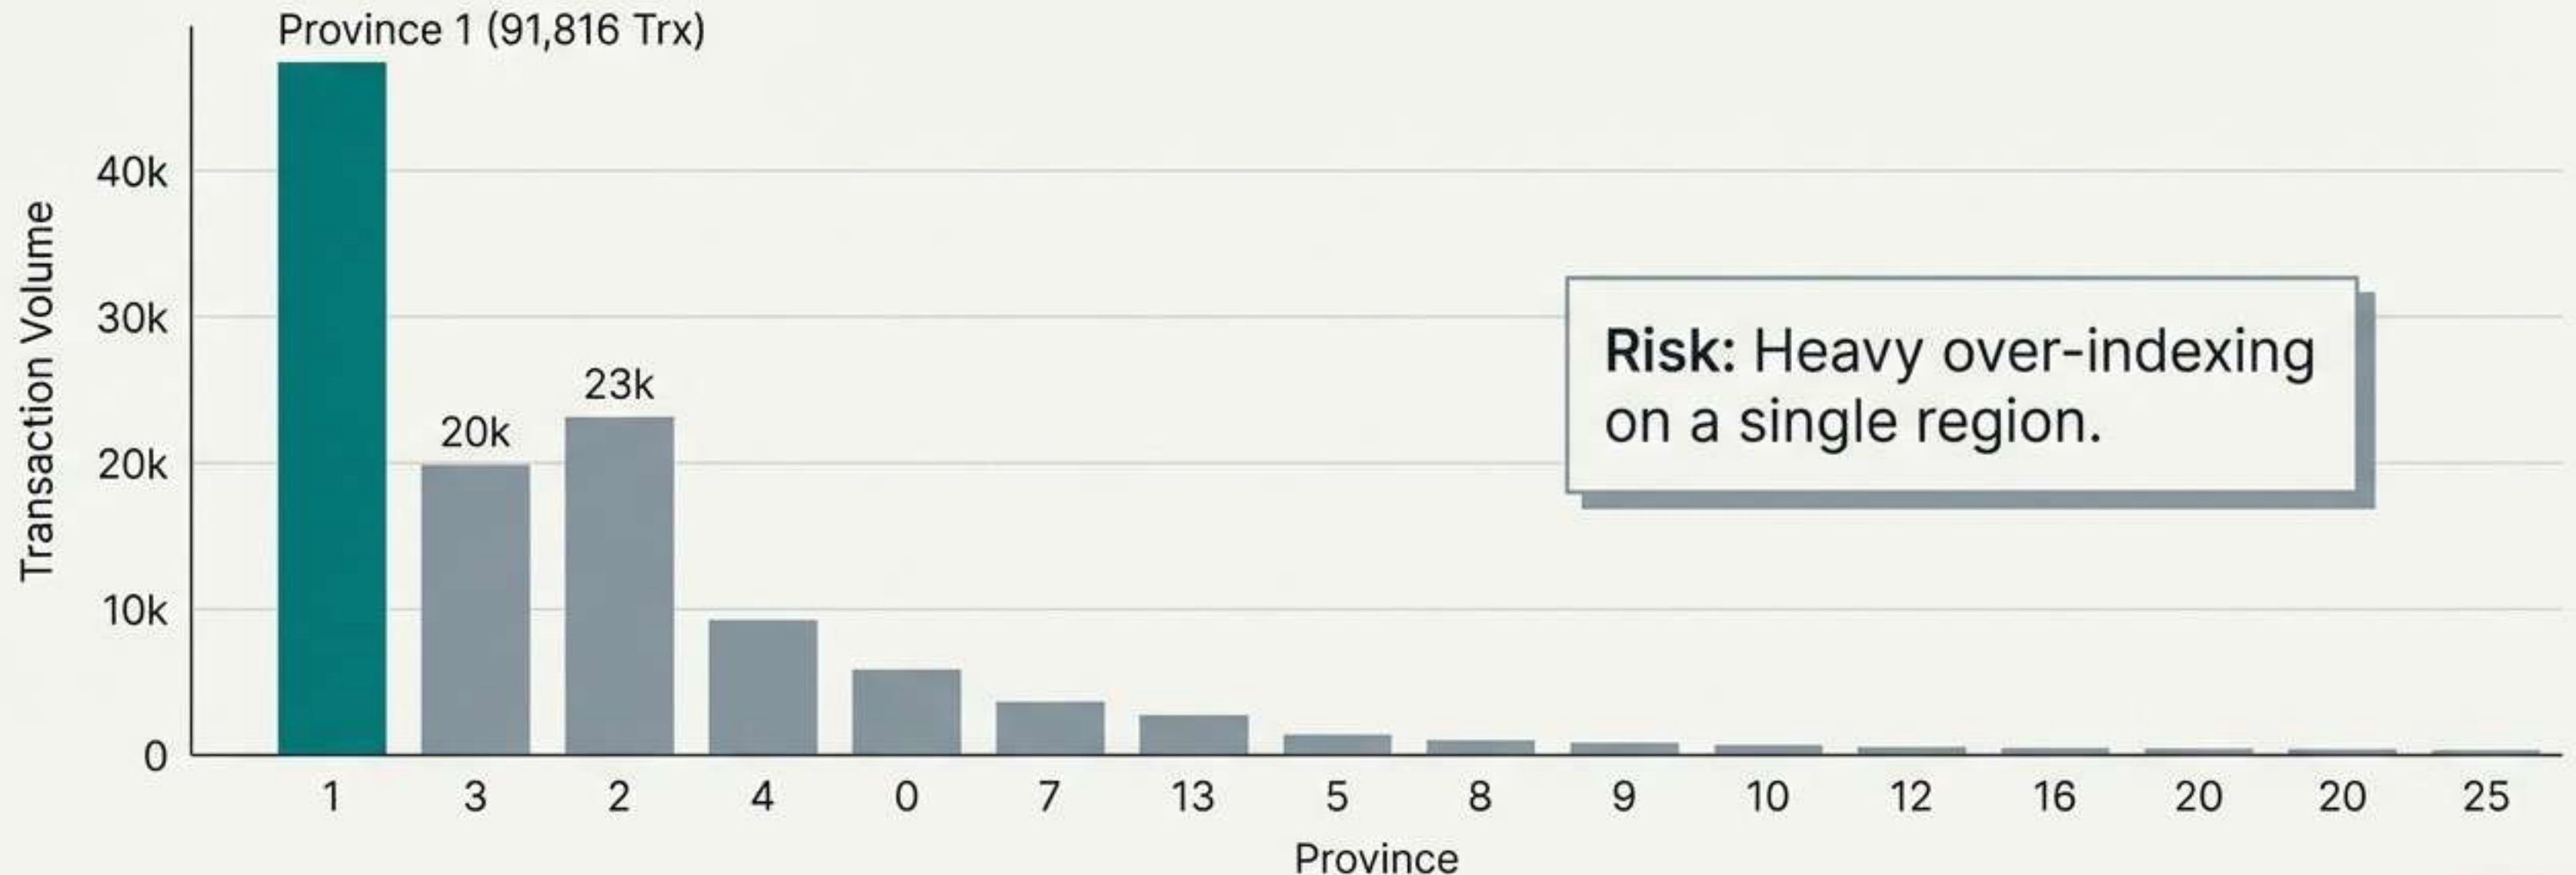

The 'Lunchtime Economy': User activity peaks predictably at midday.

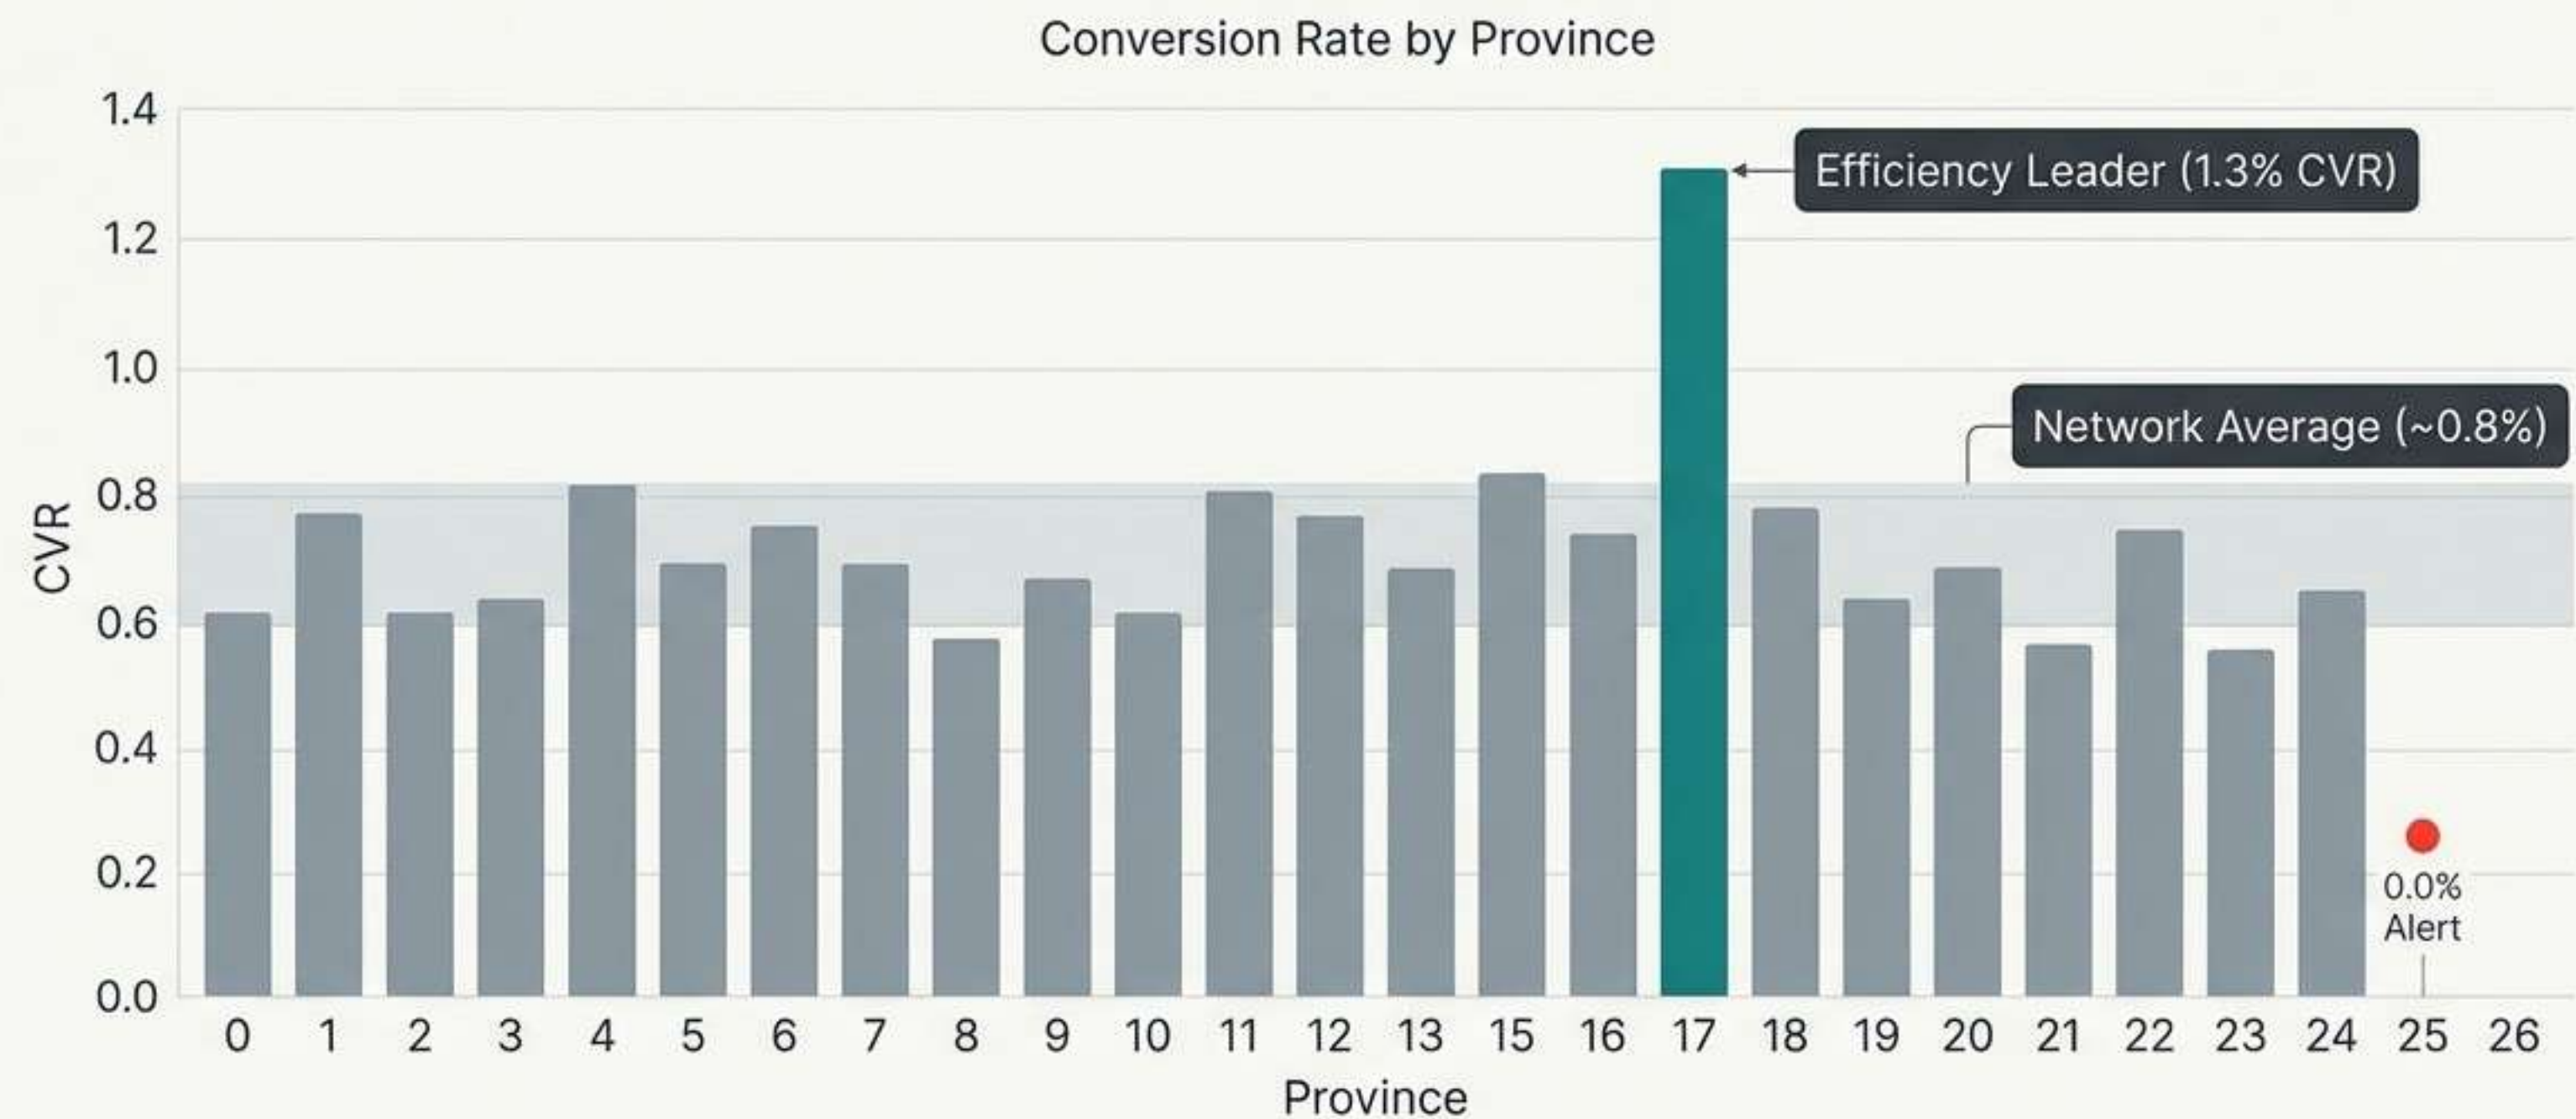

Recommendation: Schedule push notifications for 11:30 AM.

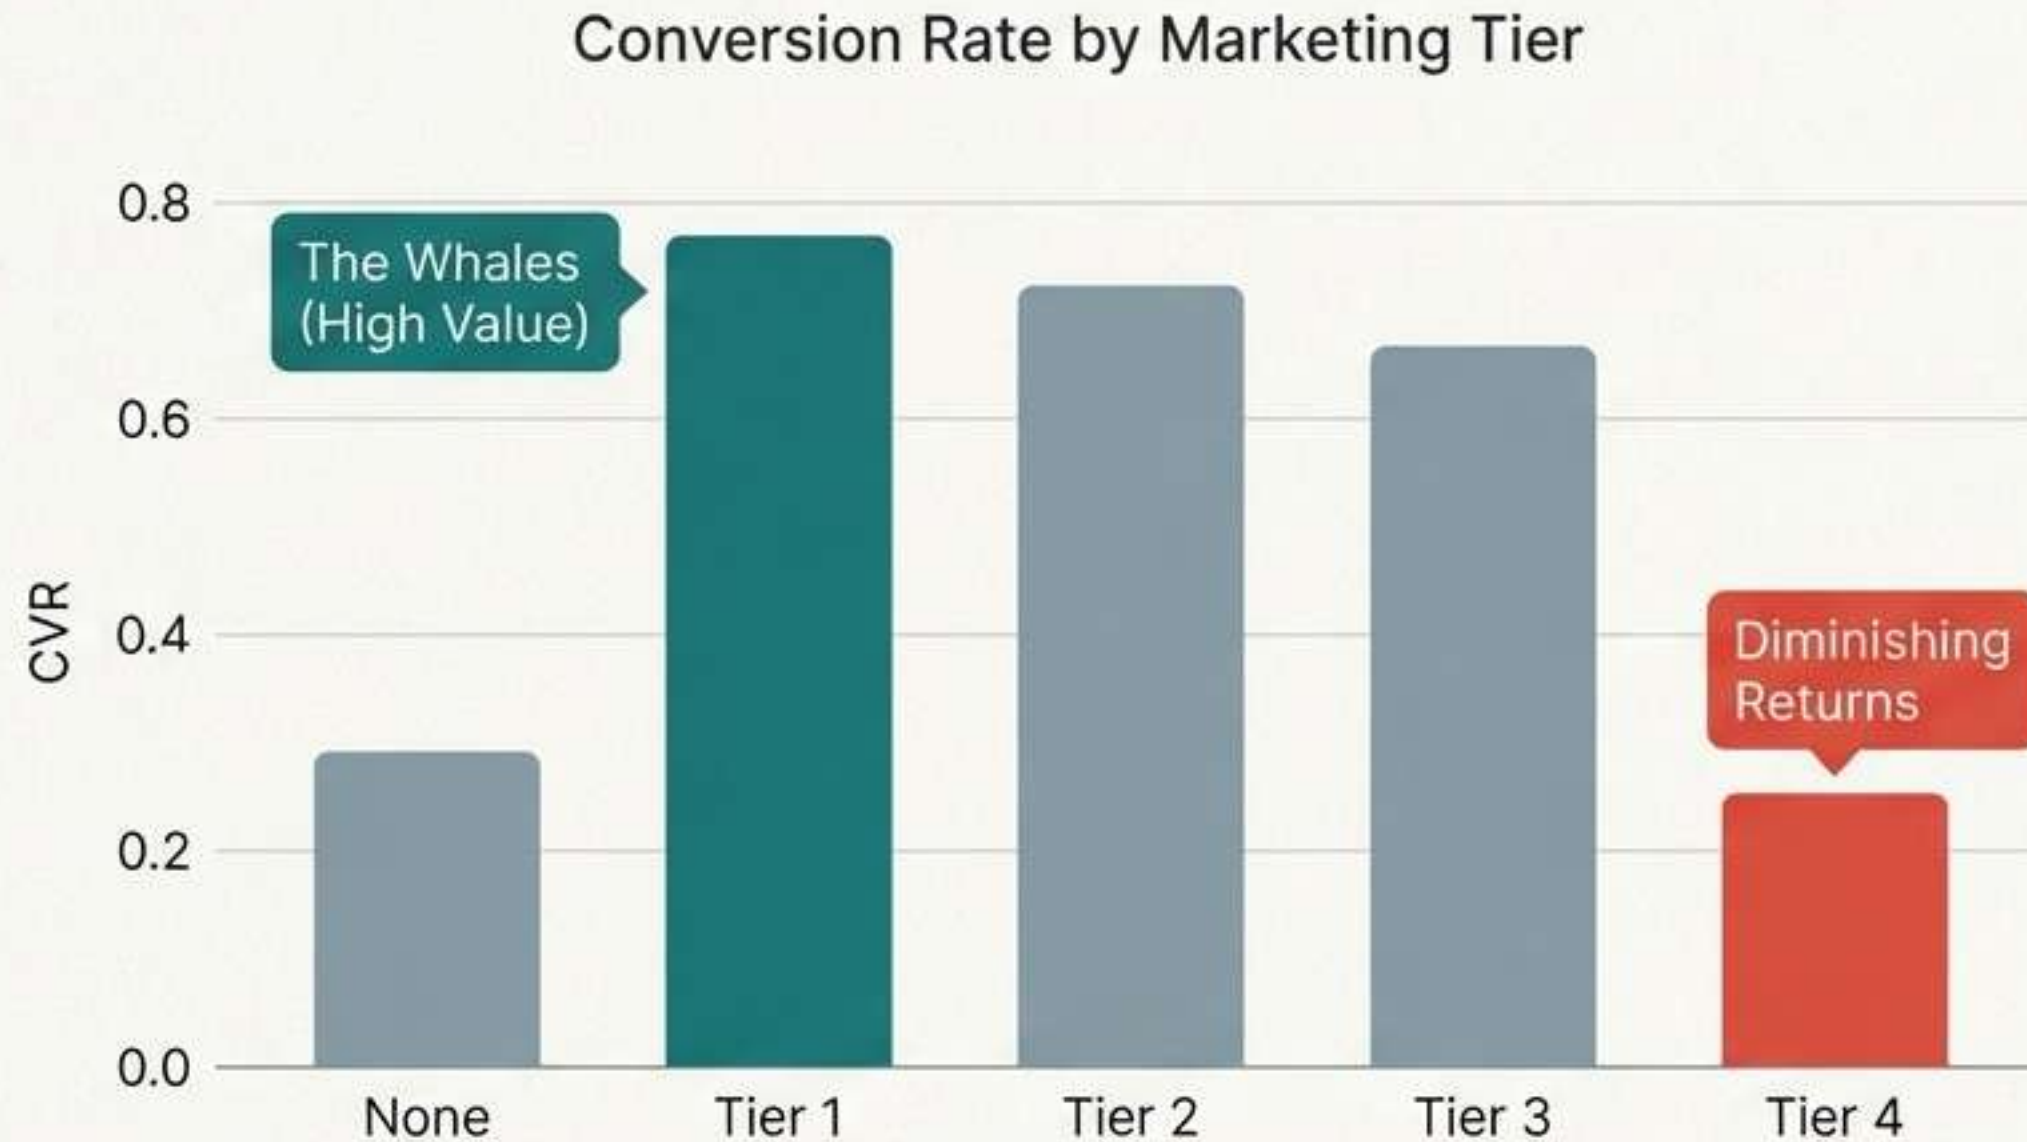

Regional Volume: Province 1 is the dominant engine of our ecosystem

Regional Efficiency: Province 17 outperforms in conversion quality.

Tier Segmentation: 'Tier 1' users drive both volume and conversion

Retention Logic: Returning users provide the stability of the platform.

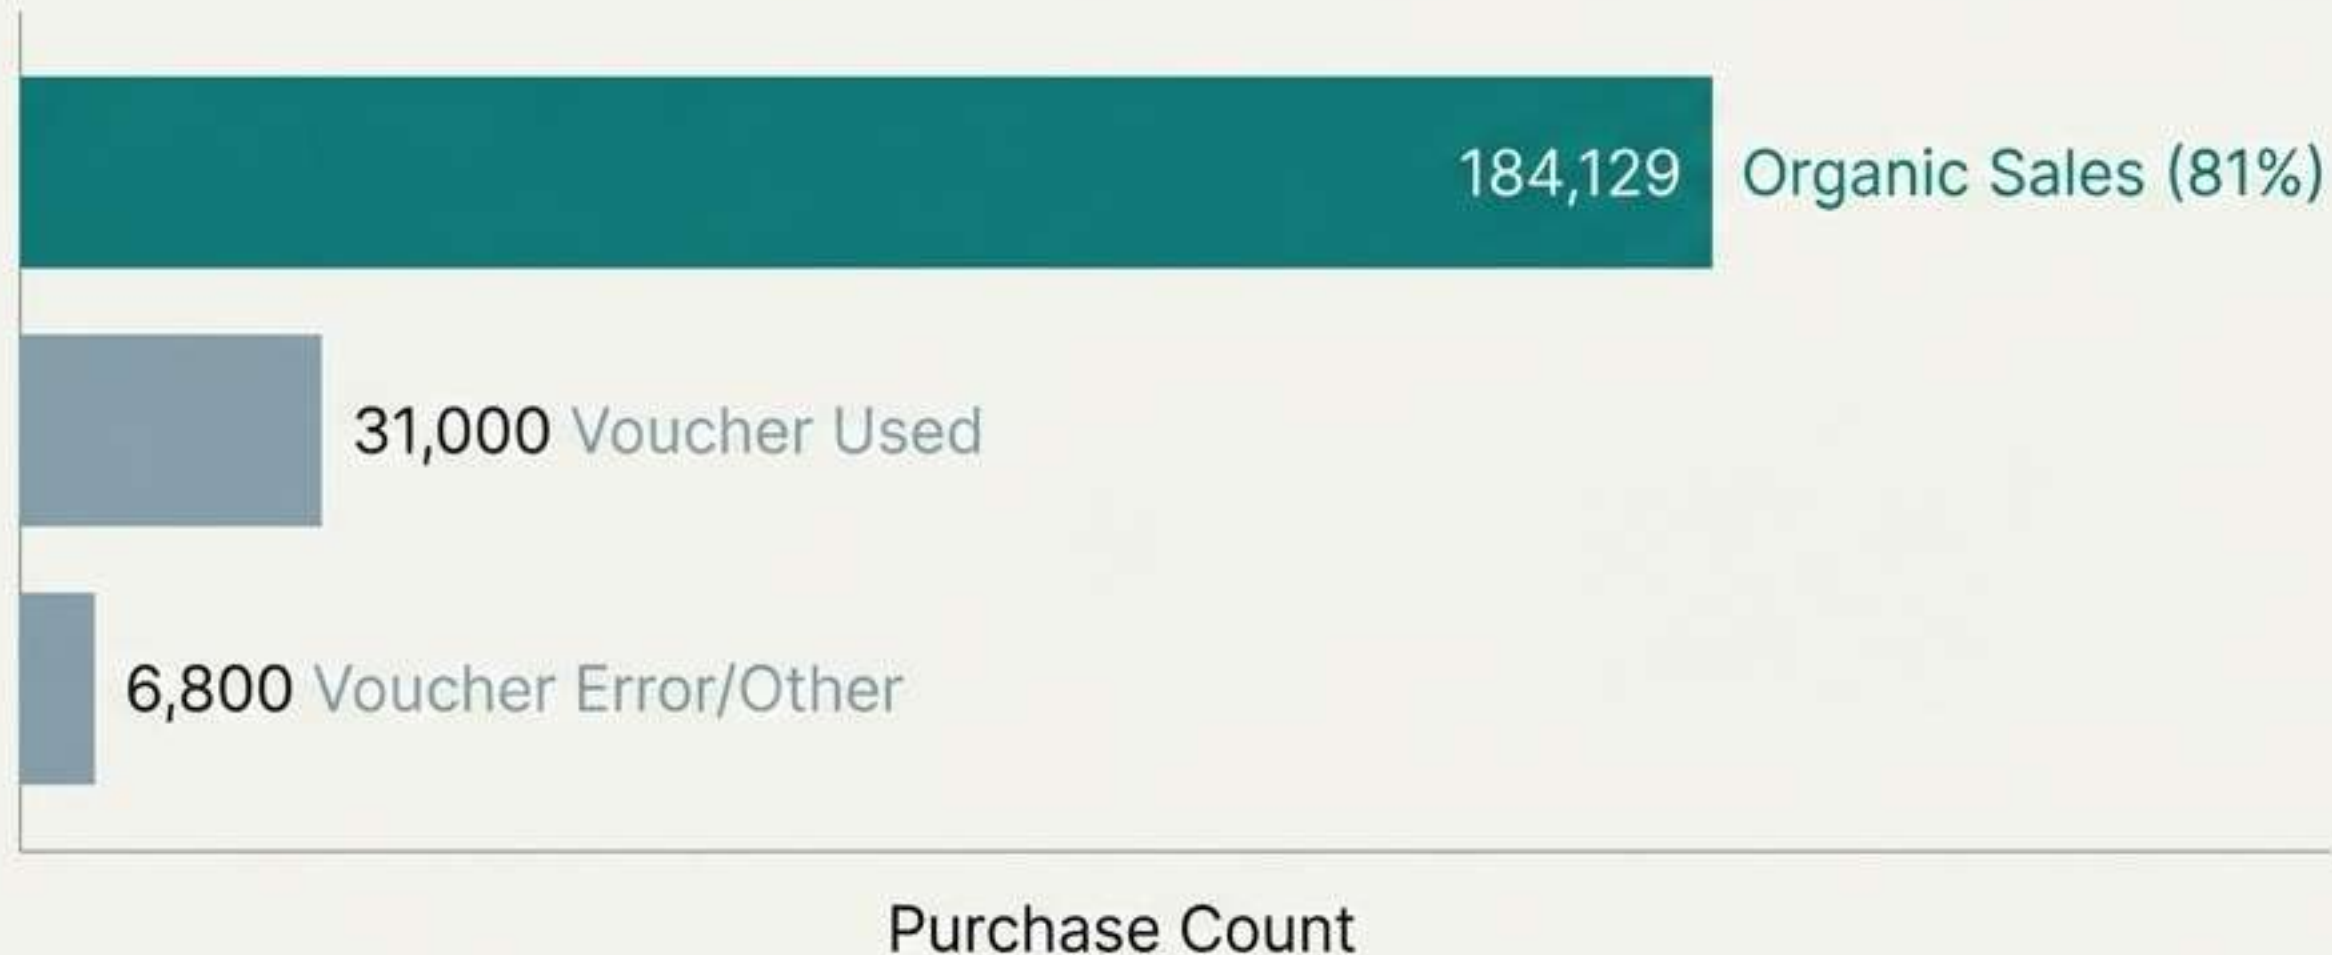

Purchase Volume

Prior purchase history is the strongest predictor of future conversion.

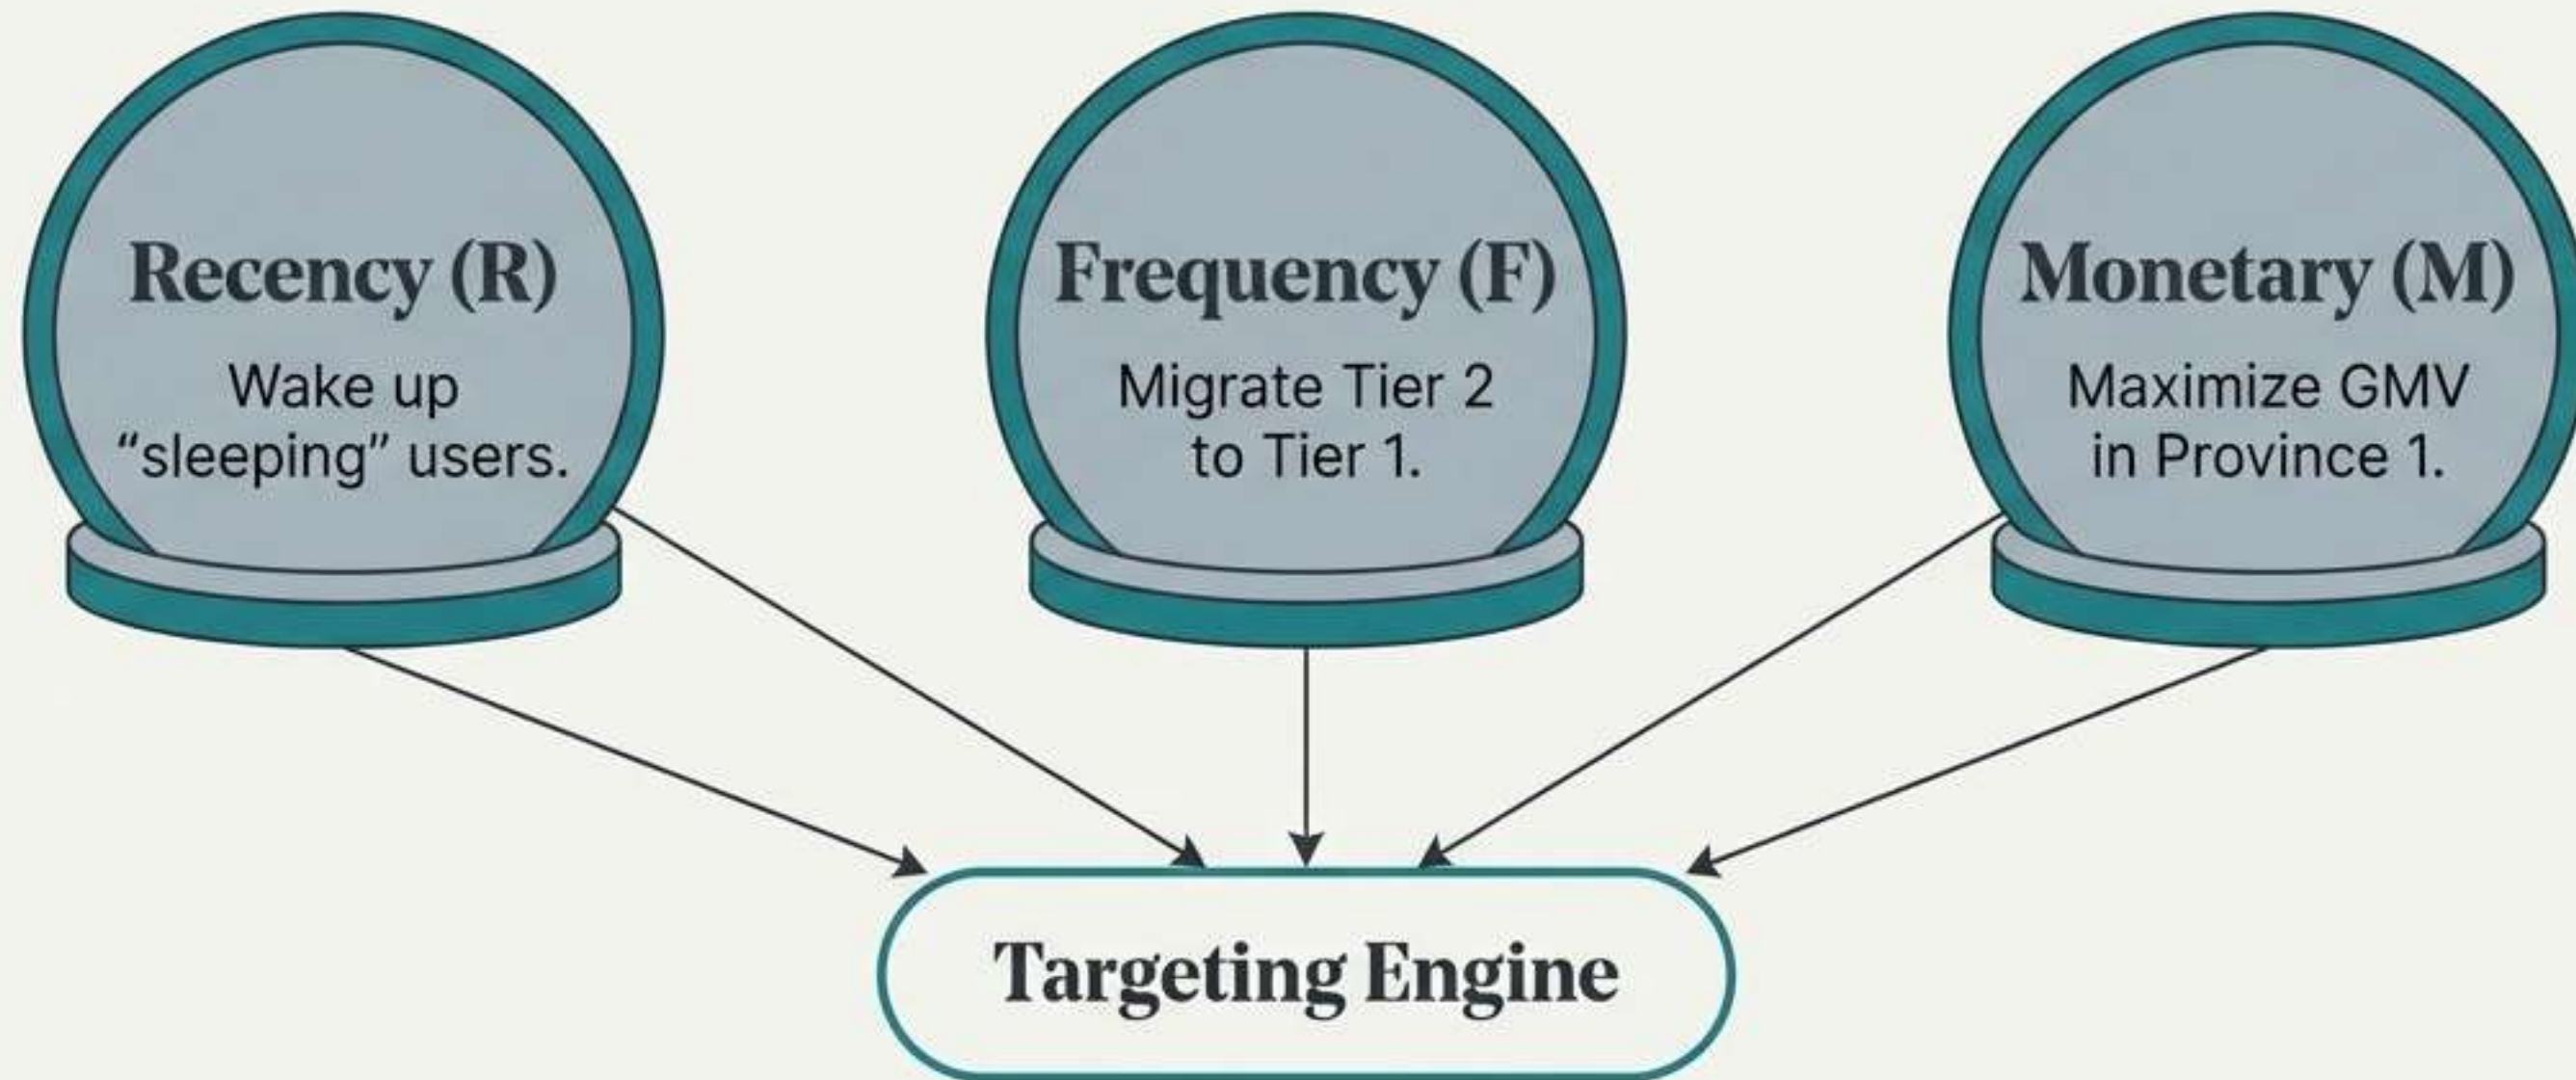

The Voucher Paradox: High organic intent drives the majority of sales.

Purchase Counts by Voucher Type

Strategic Implication:
We are subsidizing organic behavior. Shift voucher spend to acquisition, not retention.

Framework for Action: Implementing RFM Segmentation

Moving from broad-spectrum marketing to precision behavioral targeting.

Strategic Recommendations

Temporal Targeting

Launch "Power Hour" push notifications at 11:30 AM to capture the 12:00 PM intent spike.

Geographic Optimization

Fortify Province 1 logistics. Audit Province 17 tactics for network-wide replication.

Spend Efficiency

Eliminate vouchers for Tier 1 Returning Users. Reallocate budget to Tier 4 reactivation.

The Path to 2% CVR

“By shifting focus from broad acquisition to targeted retention of our ‘Lunchtime Loyalists’ in Province 1, we can double our conversion efficiency without increasing ad spend.”
